ÖLFLEX® CLASSIC 100 YELLOW

Application

ÖLFLEX® CLASSIC 100 YELLOW cables are PVC connecting cables for flexible use and fixed installation for medium mechanical use for special warning feature acc. to EN 60204 part 1. They are suitable for use in dry, damp and wet areas. If using outdoors, observe the indicated temperature range and use with UV protection. They are largely resistant to acids, alkalis and certain oils at room temperature. ÖLFLEX® CLASSIC 100 YELLOW cables are suitable for occasional, non-automated movements. The maximum tensile load is 15 N/mm² of conductor cross-section during installation and operation. Compulsory guidance is not permitted.

This cable is suitable for torsion application in wind turbines (WTG). The torsional load is limited to applications, as they typically occur in the loop of a wind turbine.
